Mr Craig Power.  
Safety Consultant.

Dear Craig,

Thank you very much for your presentation today on 'Learning from experience.'

From your presentation the health, safety and environment professional practice students learnt a lot about the work of an occupational safety and health professional through your explained experiences of working for many different companies. Students appreciated the information that you provided about what is required for effective workplace safety and health management, the importance of being customer focused, problems that you have encountered while working as a safety advisor and how you overcame this problems. The explanation of how to investigate and prevent work related accidents, examples of why it is vital to care for the health and safety of employees, the information about your invention, lessons learnt, publications written, the importance of networking and mentoring students found particularly useful.

You have a good interactive presentation style that maintained the listeners' involvement and you answered all student questions well.

Yours sincerely,

A handwritten signature in blue ink that reads "Janis Jansz". The signature is fluid and cursive, with the first name "Janis" and last name "Jansz" clearly distinguishable.

Dr Janis Jansz. PhD.  
Health, Safety & Environment Professional Practice Coordinator.
